DETAILED ACTION

Allowable Subject Matter

1. Claims 6-10 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art does not disclose or fairly suggest wherein a method having all the features of:

A method for extending a redundant switching matrix without interruption for a communication system ..., the method comprising the steps of:

Reserving additional memory space for storing the routing address of a largest required switching matrix extension both in a header translation table and in the cell header of each ATM cell by placing at least one zero in front of the routing address.

Writing the new routing address for the paths via the extended switching matrix to the additional memory space.

It is noted that the closest prior art, "A scalable ATM switching system architecture", by Wolfgang Fischer et al., hereinafter known as Fischer, IEEE Journal of selected areas in communications, 9(1991) October, No. 8, New York, US discloses the architecture of an ATM switching system. However, Fischer failed to disclose specific measures as addressed in the underlines above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
